DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Burgess et al.
3. Claims 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Burgess et al., Wong et al. or Emmons et al.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burgess et al. in view of Official Notice. Burgess et al. discloses the claimed invention except for the claimed outflow valve. Official Notice is taken that the claimed outflow valve is well known. Hence, it would have been obvious to one having ordinary skill in the art at the time the invention was made for the outflow valve of Burgess et al. to be of the claimed type in view of the above taken Official Notice in order to provide Burgess et al with a conventional type of valve.

6. Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Burgess et al., Wong et al. or Emmons et al. Burgess et al., Wong et al. or Emmons et al. discloses the claimed invention except for sampling rate. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the sampling rate to be every 5 or 50 milliseconds, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

8. Claims 9-16 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
